It should be noted that these books are intended only to indicate the standard expected of pupils on the completion of the high school course. These books are not suitable for such junior classes as III and IV, and, if used, they should be confined to the last year of study.

### Geography.

For use in the Upper Classes of High Schools in Bengal.

The teaching of this subject, by whatever method is adopted, must in every case be supplemented by the use of maps, charts and pictures. Teachers should consult the "Teachers' List" and apply to leading publishers for their lists, as these are now comprehensive and specially adapted to the needs of Indian schools. Such pictures as "Scenes from other lands" (Macmillan) are suitable for school work, are interesting to children and bring brightness and colour to the class-room. Head Masters are requested to see that all the school maps and pictures are on view every day and not stored in office-rooms.

## GEOGRAPHY.

E. Marsden	... Geography for senior classes, Parts I and II.
The World with fuller treatment of India	(Longman's Geographical Series for India, Book II).
F. D. Unstead	... The Practical Geography, Parts I and II.
B. C. Wallis	... Macmillan's Geographical Exercise Book (India).

Open only to candidates whose vernacular is not this language.

The following books are recommended for the use of teachers:—

Blandford	...	The Rudiments of Physical Geography for the use of Indian Schools.
Frew	...	A Regional Geography of the Indian Empire (Blackie and Son.)
Wallis	...	The Teaching of Geography (Cambridge University Press.)
O'Malley	...	Bengal, Bihar and Orissa, Sikkim (Macmillan & Co.).

The following book is recommended for the use of teachers in connection with the teaching of "Sand Modelling" in the lower classes of schools:—

A. E. Frye	...	The Child and Nature.
------------	-----	-----------------------

Every school that intends to undertake instruction in Geography for the Matriculation Examination is required to possess the apparatus mentioned in the following list:—

I.—(The total cost need not exceed Rs. 65).

- (1) A measuring tape.
- (2) A magnetic compass.
- (3) Squared paper and tracing paper.
- (4) Clay, dry sand, paper pulp for modelling.
- (5) A globe not less than 14 inches in diameter, with writing surface, and with line of latitude and longitude, and outlines only of the land masses marked upon it.
- (6) A map of the school locality on a scale of 4" or 6"=1 mile.
- (7) A map of the district in which the school is situated on the scale 1"=1 mile.
- (8) A coloured map of the province.
- (9) A coloured political map of India.
- (10) A physical map of India.
- (11) A relief map of India.
- (12) A map of the world on Mollweide's equal area projection and a map of Asia.

It is essential that the students should be provided with atlases, or with the necessary hand maps, and with a drawing instrument box. Maps for school work should not contain too much detail or be crowded with names.

II.—The following additional equipment is recommended when it can be provided, but the lack of it is not to be considered as a bar to the recognition of the school in Geography:—

- (1) A thermometer.
- (2) A mercury barometer.
- (3) A rain-gauge.
- (4) A small collection of typical rocks, in particular those of the province and India.
- (5) A small museum of typical products.
- (6) A good standard atlas.
- (7) Geographical pictures.
- (8) Magic-lantern and slides.

1. The attention of teachers is requested to the raised maps of Bengal and Eastern Bengal and Assam made of paper pulp, prepared by Babu Kailaschandra Datta, Head Pundit, Habiganj Government Girls' School, Sylhet, and sold for Rs. 7 and Rs. 5 respectively.

2. Globes of all kinds are made by George Philip and Son, London, W. and A. K. Johnston, London, and Messrs. Ruddiman Johnston, London. Small hand Globes of German make can be obtained through the Indian School Supply Depot for about a rupee each.

3. The "Comparative" series of large wall maps of the continents published by George Philip and Son is good and up to date; so also are the Orographical wall maps published by Edward Stanford. Messrs. Ruddiman Johnston publish a series of smaller wall maps which include maps of India illustrating various distributions.

Messrs. Nelson's wall atlases are good. Mr. S. B. Chatterjee publishes District maps; also ordinary and relief maps of the province.

Babu L. M. Basu, the drawing master of the Dacca Collegiate School, has published good relief maps of Eastern Bengal and Assam and of India.

The Vidal-Lablache French wall maps on strong cardboard, named on one side, and the same map without names on the reverse, published by Armond Collin, Paris, are good and cheap. They measure 46 inches by 39 inches and can be delivered in Calcutta for Rs. 4-14 each.

4. The hand-maps, coloured to indicate relief published by the Diagram Company West Barnes Lane, New Malden, Surrey, at one penny each are the best of their kind.

The uncoloured half penny maps, showing river systems and a few towns, published by the same Company are excellent for class use.

The Autograph hand maps, with hill shading in brown, published by Messrs. Edward Stanford, London, at one penny each, are very good, and are larger than the Diagram Company's hand-maps. The 15-inch map of the world on Mollweide's equal area projection is especially to be commended.

5. Wall pictures of considerable artistic merit are published by Messrs. Edward Arnold of Leeds, Messrs. Hachette of Paris and Messrs. Holzcl of Vienna, and Messrs. Longmans Green and Company. The cost, delivered in India, from two to three rupees each.

Map lantern slides and view slides especially prepared for Geography teaching are sold by the Diagram Company for two or three shillings each. Mr. Bartington Smith of Darjeeling also sells good picture slides of the Himalayas at Rs. 15 per dozen.

#### ELEMENTARY MECHANICS.

The following books are recommended:—

Sir Philip Magnus	...	Elementary Mechanics (Longmans, 1903).
A. N. Sen	...	Elementary Mechanics.

The following list of apparatus is prescribed as indicating the approximate requirements of a recognised High School seeking to teach Elementary Mechanics for the Matriculation Examination:—

Plumb-line and level.  
 Simple lever (including brass slotted weight).  
 Roman steel yard.  
 Lecture apparatus for experiments on movements.  
 George's New Atwood's Machine.  
 Stop-watch.  
 Glazebrook's apparatus (to demonstrate movement of a body).  
 Hick's Ballistic Balance.  
 Compound Wheel and Axle.  
 4 Single Brass Pulleys.  
 2 Single Brass Pulleys.  
 2 Triple Brass Pulleys.  
 Weston Differential Pulley Blocks ( $\frac{1}{2}$  ton)

 Inclined Plane.  
 Parallelogram of Forces apparatus.  
 Wall Crane.  
 Becker's New Physical Balance.  
 Set of Gramme Weights (200 grams to 1 mgr.).  
 2 Composition-ivory Balls.

*Note*—The above list is not exhaustive, and much of it might be replaced by similar forms that could probably be made far more cheaply by any clever mistry under proper supervision. In most cases, however, it will probably be found advantageous to buy such a set as indicated in the list specially for demonstration purposes, and subsequently to develop simplified duplicates, illustrating the same principles, which the boys should be given opportunity actually to experiment with on their own individual account or working in pairs.
